PROFESSIONAL SUMMARY

Dedicated professional with experience in mobile application development, web interfaces, REST APIs, and proficiency in version control using Git and GitHub. Demonstrates resilience in the face of challenges, agility in learning new languages, and the ability to work in a team, contributing to innovative and effective solutions in complex projects.

PROFESSIONAL HISTORY

11/2024 - Current

Full-Stack Developer

BeHOH - João Pessoa, Paraíba

Application development and maintenance (Kotlin and React Native), web interfaces (React), UI/UX, and development of new functions in REST APIs (Java Spring).

- Developing responsive interfaces for websites, adapting page display for computers and mobile phones, prioritizing a positive user experience.
- Software maintenance after programming, ensuring the quality, security, and stability of the systems.
- Performing software tests, applying essential procedures to validate program quality and ensure proper functioning.
- Analysis of system and application performance, identifying opportunities for improvement to optimize program performance.
- Creating new software, following code development rules and procedures to meet project specifications.

Technologies: TypeScript, React, Kotlin, React Native, Java, Spring, Docker, Terraform, Google Cloud, Chakra UI, CSS

11/2023 - 02/2024

Full-Stack Developer

Gloma Collective (volunteer) - Rio de Janeiro, Rio de Janeiro

Active participation in the initial project decisions, defining the technologies to be used according to the volunteers available to assist in the project, as well as initiating the repositories, initial functions, assisting in the decision on the project's layout and visual identity.

- Planning and executing activities according to established deadlines, contributing to the smooth running of operations.
- Project risk management, identifying and mitigating potential problems, minimizing impacts on progress and results.
- Project management, encompassing conception, alignment of expectations, and start of operations.

Technologies: TypeScript, NestJS, React, TypeScript.

07/2022 - 07/2023

Trainee

Living Consulting LTDA - Rio de Janeiro, Rio de Janeiro

My role involved developing and maintaining automation scripts using Selenium WebDriver (TypeScript) and developing and maintaining web interfaces (AngularJS).

- Performing functional tests on the system, detecting interface, behavior, and performance problems, ensuring the correct operation of commands.
- Software maintenance and updates, implementing fixes and improvements to optimize system performance.

Technologies: TypeScript, AngularJS, Selenium WebDriver, Node.js, NestJS

ACADEMIC BACKGROUND

01/2020 - 01/2022

Technologist: Systems Analysis and Development

Estácio - Barra

Status: *Completed*

SKILLS AND COMPETENCIES

- Ability to work in a team
 - Practical experience with mobile application development.
 - Resilience in the face of challenges and setbacks.
 - Dedication to solving software problems.
 - Proficient in code versioning with Git and GitHub.
 - Agility in learning new languages
-

OBJECTIVE

- Seeking an opportunity as a Full-Stack Developer in order to contribute to the company's growth.
 - Seeking growth and development of my skills as a professional in the field.
 - Seeking new challenges and achievements in the field as part of the development team.
-
