+55 21 99086-8835

João Pessoa, PB

Developer with 5 years of experience, specialized in TypeScript and modern web technologies, with a strong foundation in computer science. Experience in building high-performance, scalable applications, SEO optimization, automated testing, CI/CD, and static typing. Advanced English proficiency (C1) and previous experience working in international environments.

Work Experience

Full Stack Developer Nov 2024 - Feb 2026

BeHOH | João Pessoa, Paraíba

- Led the development of a complete CMS platform (B2B and B2C), delivering 4 mobile apps and 6 web platforms handling critical flows for coupons, pricing, and registrations.
- Developed responsive interfaces using React, TypeScript, HTML5, and CSS3, leveraging Vite and Webpack, building reusable components with Chakra UI, and reducing support tickets by 40%.
- Implemented automated testing (Vitest, Jest, Selenium), achieving 90% code coverage, and configured CI/CD pipelines with GitHub Actions for automated deployments to Vercel, AWS, and Cloudflare.
- Improved SEO performance by 80% through semantic implementation and indexing strategies.
- Designed scalable state management solutions using TanStack Query and Context API, ensuring efficient data flow in complex applications.
- Standardized RESTful API contracts with advanced TypeScript typing, reducing runtime errors by 30%

QA Intern / Developer Jul 2022 - Jul 2023

Living Consultoria Ltda | Rio de Janeiro, Rio de Janeiro

- Developed and maintained the main end-to-end test flow (Selenium WebDriver) for a major client's e-commerce platform, automating 10 critical flows and eliminating manual testing in the regression cycle, applying advanced problem-solving skills.
- Performed functional system testing, identifying and solving functional defects through effective troubleshooting, ensuring correct interface, behavior, and performance.
- Maintained and updated software, implementing fixes that optimized system performance by 40%, demonstrating performance optimization and ensuring stability in automated flow execution.

- Demonstrated strong collaboration by working with senior developers to identify critical bugs during testing, proposing solutions that improved e-commerce platform stability.

Volunteer

Full Stack Developer (Volunteer)

Nov 2023 - Feb 2024

Coletivo Gloma

Led the definition of the tech stack and architecture for a team of 8 volunteers, structuring both frontend and backend, planning weekly cycles, and delivering the first interfaces within 2 weeks. Managed risks, timelines, and project alignment while developing the initial responsive screens.

Core Skills

Typescript, React, Tanstack Query, Recharts, Chakra UI, Vitest, Jest, AWS, NextJS, Node.js, Git, Javascript, HTML5, CSS3, Tailwind, SQL, front-end, PostgreSQL, mysql, spring boot, mongodb, Python, Scrum, NPM, GCP, Kanban, Express, CI/CD

Education

Estácio Jan 2022 - Jan 2024

Bachelor Analysis and Systems Development

Languages

Português (Native), Inglês (Advanced (C1))
